

Comparative Adjectives- Miming Games

Game 1: Guessing mimes

Mime both the adjective and comparative adjective form of one of the lines below for your partner to guess, for example with an angry face and then an even angrier face. Whenever your partner guesses correctly, switch roles and do the same. You can make sound effects if you need to, but don't speak (even to tell them if they guessed correctly or not).

Game 2: Guessing and miming

Mime one of the (plain) adjective sentences on the left of one line below (not the comparative form on the right). Your partner should guess the sentence that you are miming and then say and mime the comparative version, making sure that it is more extreme than the version that you mimed. For example, they should make sure that what they are doing really shows "bigger ears" (not just big ears).

Comparative forms presentation

When you finish the game(s), test each other on the comparative forms below.

Find examples of these kinds of words and make rules about making comparative forms:

- Word ending in -y
- Three or more syllables
- Two syllables
- One syllable
- One syllable with a short vowel sound and then just one consonant

Adjectives plus nouns version
